

I want to express my desire for the FCC to keep the rules enacted in 2015 and to keep net neutrality. I have yet to see a clear and concise argument that actually outlines how ending these laws will benefit smaller ISPs and help the market. I think it will do more harm on the form of small business, startup companies and the individual users of the internet. I think it is telling when the CEOs of companies like Netflix say that this won't hurt them (because they are big enough to withstand it), but will hurt small companies. I also think it is disgusting that Chairman Pai has openly admitted to taking comments that are "higher quality" (as determined by what standards?) with more weight. Every citizen has an equal right to be heard and Chairman should not forget his role. It is the duty of the government to protect the consumers and the citizens that cannot protect themselves. Chairman Pai's actions and his plan fail to do just that.

The notion of "internet freedom" purposed by the FCC seems flawed, as it represents internet freedom for the companies that provide this tool to the public, allowing them to restrict the internet freedom of other businesses and individuals by creating "slow lanes" and "fast lanes". If some companies can pay ISPs to have their content load faster, startups and small businesses that can't pay those fees won't be able to compete. This will kill the open marketplace that has enabled millions of small businesses.

Please publicly support net neutrality protections by denouncing the FCC's current plan and not voting for it these changes on Dec. 14th.

Thank you,

Wiley Sinkus
